

Baloskion tetraphyllum 'BUNNAN' PPAF - Restios from the fynbos of South Africa are gaining popularity in the US for their rush-like architectural foliage. This compact dwarf Aussie restio offers many of the same benefits of the large restios in a smaller package which makes it ideal for containers and smaller gardens. Selected because it only grows to about half the size of the species and a high degree of basal branching. For a "southern plant", handles a fair amount of shade, water, cold and frost.

Leaf: • Feathery linear-shaped leaves born on tightly clumped tussocks of culms giving the plant a rush-like appearance.

Habit: • 24-30 in H x 12-18 in W; upright tussocks
• Compact & well-branched, dwarf form
• Zones 9-11; evergreen

Apps: • Can be used in general landscape applications in both the western US and the Southeast. Use in a shady to sunny spot of any garden. Works in rain gardens and also in containers.

Bloom: • Compact flowering spikes with brown bracts sit at or just above the foliage in spring and summer.

Notables: • **LIKES** - Moderate shade to full sun; moderate moisture
• **DISLIKES** - Extended dry periods or extreme cold.

Sales Niche: • Foliage plant with a unique texture and a nice habit; great for water gardens and other wet landscapes.

CROP TIME:

1-gal: 6-8 mos. from liners
3-gal: 9-12 mos. from liners

*depending on inputs & climate

SALES STRATEGY:

Sold for it's foliage, meaning a sales window as big/long as your season!

LANDSCAPE NICHE:

Use as a specimen or in groups in wet or low lying areas that tend to collect water. Great accent plant near water features.

CONTAINER APP:

Absolutely! Best in mixed containers that receive regular irrigation.
